1. Brief Description of Your Startup Idea

In 150–200 words, describe: the problem you are solving, who faces this problem, and your proposed solution. Keep it simple and jargon-free — assume the reader is unfamiliar with your domain.

- What problem are you solving, and for whom?
- What is your proposed solution / product idea?
- What stage is it at today (concept / early prototype / working MVP)?

2. Expected Outcomes

- What will be built or achieved by the end of the grant period?

3. Work Plan & Timeline

Break your plan into short phases (e.g., 4–8 weeks each) with a clear, specific activity for each.

Phase / Duration	Key Activity	Milestone / Deliverable
